

Environmental Goal

Environmental sustainability goals are set objectives aimed at conserving natural resources, reducing pollution, and promoting sustainable practices.

They guide individuals and organizations in making eco-friendly decisions, contributing to a healthier planet and a more sustainable future

Paperless

- All staff reminds to control of using unnecessary paper during the daily operation.
 - Need to think about the needs before printing on any email, contract, quotation and any other all kinds of document.
 - Always to use double sided photocopying when its needed
 - Always to use recycling paper in priority when available

- Regular email message will be sent out to all staff to remind the above message for environmental protection.

Target

We would aim at to reduce paper using by 25% in 2025. Further review will be conducted in end of 2025 by Macrotech senior management for the overall outcome.

Energy Saving

All staff has to comply with the below procedure before leaving office.

- Switch off all unnecessary lighting, air-conditioning and all electricity appliances
- Air-conditioning will always keep in 23 degrees when needed.

- Macrotech is also continuously looking for other methods and/or technology to assist on saving all kinds of energy

Target

Macrotech is aim at to reduce energy using by 20% in 2025. Further review will be conducted in end of 2025 by Macrotech senior management for the overall outcome.

Mid-term Planning

Macrotech will purchase 100% renewable energy for our operations by end of 2025 to reduce carbon emission.
